

National Capital Region Chapter of the
ACM Special Interest Group on Computer Human Interaction

XML

Presented by **Brian Thompson**, Interaction Designer at Nortel Networks

What?

What is XML?

How will it change the way we design?

The two most important things for Microsoft in the new millennium: Windows 2000 and XML. Bill Gates - Microsoft

By year end-2003, remembering how things were done "before XML" will be as difficult as it is today to remember how they were done "before the web". Gartner Group - 2000.

Who?

Brian Thompson, currently an interaction designer at Nortel Networks, has a long and colourful past, which included playing bassoon in symphony orchestras, building robotic dinosaurs for the ROM and time machines for the Canadian Museum of Nature. Interested in pattern languages, agents and active network objects as well as map making, XML is the next logical step.

Where and When?

The meeting takes place on Tuesday, February 27, 2001 at 7:00 pm in the Conference 2 Boardroom at the Nortel Skyline location.

Directions and a map can be found at www.capchi.org

Note: All attending will be required to register with security. Please arrive 5-10 minutes earlier to allow for registering. The meeting fee is \$5 for non-members and free for CapCHI members (\$20 / year).
